Index to
JOURNAL OF ENGINEERING FOR POWER

Volume 81, 1959

The Journal of Engineering for Power for 1959 was issued quarterly in January, April, July, and October.

Issue	Page Numbers
January	1–110
April	111–214
July	215–360
October	361–454

A

AERODYNAMICS. *See* INDUSTRIAL FURNACES

AIR-COAL MIXTURES. *See* COAL HANDLING, PNEUMATIC CONVEYERS

AIR POLLUTION
Characteristics of airborne particles..... 7
Studies of air pollution control by Southern California Edison Company..... 1

AIRPLANE ENGINES
Aviation gas turbines..... 265

ALLEN, J. F.
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping (D)..... 139

ALLOYS. *See also* CORROSION, HIGH-TEMPERATURE MATERIALS, METAL TESTING
Materials (for gas turbines)..... 219

ARCHBOLD, M. J.
Use of flow models for boiler-furnace design (D)..... 378

ARNOLD, F. R.
Flow-induced noise in heat exchangers (D)..... 420

ASTLEY, W. C.
Control system of a 225,000-kw double-automatic extraction steam turbine and related reducing stations (D)..... 120

AUTOMATIC CONTROL
Operating results of an experimental supercritical steam generator..... 55

AUTOMOBILE ENGINES. *See* GAS TURBINES

AVAILABILITY BALANCE. *See* POWER PLANTS-STEAM, THERMODYNAMICS

B

BAHR, H. C.
Load capacity tests on tapered-land and pivoted-shoe thrust bearings for large steam-turbine application..... 208

BAIRD, R. C.
Flow-induced noise in heat exchangers (D)..... 420

BARLOW, E. L.
Railroad gas turbines..... 298

BATES, CARLTON J.
Rocket turbines..... 280

BAUMAN, H. A.
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping..... 133

BEACH, ROBIN
Electrostatic shaft voltage on steam-turbine rotors (D)..... 106

BEARINGS
Development of a smooth running, double-spool, gas-turbine rotor system. 151
Electrostatic shaft voltage on steam-turbine rotors..... 97
Load capacity tests on tapered-land and pivoted-shoe thrust bearings for large steam-turbine application..... 208

BEATTIE, W. C.
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping..... 133

BENEDICT, R. P.
Calibration of thermocouples by freezing-point baths and empirical equations.. 177

BEYER, F. R.
Some notes on the strength of the Enrico Fermi reactor vessel structure..... 66

BIANCARDI, F. R.
Transient response of gas-turbine-plant heat exchangers—regenerators, intercoolers, precoolers, and ducting..... 433

BLADES. *See* COMPRESSORS, TURBOMACHINERY

BOILER FURNACES. *See also* BURNERS
Use of flow models for boiler-furnace design..... 371

BOND, R. C.
Railroad gas turbines..... 298

BOOSER, E. R.
Electrostatic shaft voltage on steam-turbine rotors (A)..... 108

BOWDEN, A. T.
Some thoughts about the development of automotive gas-turbine units..... 73

BRANDON, R. E.
Load capacity tests on tapered-land and pivoted-shoe thrust bearings for large steam-turbine application..... 208

BROADLEY, P. R.
Railroad gas turbines..... 298

BROWN, W. W.
Design of 321-mw cross-compound steam turbine—River Rouge Unit No. 3 (D). 131

BUCKETS. *See* GAS TURBINES

BURNERS
Effect of fuel types and admission method upon combustion efficiency..... 423
Use of models for studying pulverized-coal burner performance..... 380

C

CALIBRATION. *See* INSTRUMENTS—TEMPERATURE

CHESTERS, J. H.
Aerodynamic approach to furnace design. 361

COAL HANDLING
Pulverized-coal transport through pipes.. 43

COMBUSTION. *See also* BURNERS, MODELS
Effect of fuel types and admission method upon combustion efficiency..... 423

COMPRESSORS
Cycle components (for gas turbines)..... 244
Measured and visualized behavior of rotating stall in an axial-flow compressor and in a two-dimensional cascade.. 24
Stage performance and radial matching of axial compressor blade rows..... 13

CONCORDIA, CHARLES
Effect of steam-turbine reheat on speed-governor performance..... 201

CONRAD, J. D., JR.
Control system of a 225,000-kw double-automatic extraction steam turbine and related reducing stations (D)..... 121

COOKE, B. W. C.
Railroad gas turbines..... 298

COOLING SYSTEMS
Turbine cooling..... 226

CORROSION
M-252 alloy for heavy-duty gas-turbine buckets..... 161

CURTIS, R. W.
Use of flow models for boiler-furnace design..... 371

CYLINDERS
Stresses in hollow cylinders due to asymmetrical heat generation..... 449

D

DAMAN, E.
Operating results of an experimental supercritical steam generator..... 55

DENNISON, EDWARD S.
Nuclear gas-turbine plants..... 352

DOOLEY, P. G.
Effect of fuel types and admission method upon combustion efficiency (D)..... 426

DREWRY, M. K.
Design of 321-mw cross-compound steam turbine—River Rouge Unit No. 3 (D). 131

DRISCOLL, J. M.
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping..... 133

DUCTS. *See* HEAT-EXCHANGE EQUIPMENT

E

EGGENBERGER, M. A.
Control system of a 225,000-kw double-automatic extraction steam turbine and related reducing stations..... 111

ELECTRICAL EQUIPMENT
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping..... 133

ELECTROSTATIC SHAFT VOLTAGE. *See* STEAM TURBINES

ENGDAHL, RICHARD B.
Pulverized-coal transport through pipes (D)..... 53

ENGINES
Compound piston-and-turbine engines... 259

ENGLE, M. D.
Use of models for studying pulverized-coal burner performance (D)..... 382

ESGAR, JACK B.
Turbine cooling..... 226

ESTCOURT, V. F.
New performance criterion for steam-turbine regenerative cycles (D)..... 399

F

FLOW OF FLUIDS. *See also* JETS
Measured and visualized behavior of rotating stall in an axial-flow compressor and in a two-dimensional cascade.. 24
Stage performance and radial matching of axial compressor blade rows..... 13
Use of flow models for boiler-furnace design..... 371

FLUE GASES
Studies of air pollution control by Southern California Edison Company..... 1

FOCHTMAN, EDWARD G.
Characteristics of airborne particles (D). 11

FOSTER, A. D.
Fuels (for gas turbines)..... 234

FOWDEN, W. M. M., JR.
Marine gas turbines (D)..... 339

FREQUENCY REGULATION. *See* INSTRUMENTS—TURBINE-SUPERVISING

FUELS. *See also* COMBUSTION
Fuels (for gas turbines)..... 234

FURNACES. *See* BOILER FURNACES, INDUSTRIAL FURNACES

FUSNER, G. R.
M-252 alloy for heavy-duty gas-turbine buckets..... 161

(D) denotes discussion of a paper.

G

GAS TURBINES. *See also* HEAT-EXCHANGE EQUIPMENT
Development of a smooth running, double-spool, gas-turbine rotor system. 151
Effect of fuel types and admission method upon combustion efficiency 423
Gas Turbine Progress Report—1958: Introduction; materials; turbine cooling; fuels; cycle components; compound piston-and-turbine engines; aviation; rocket turbines; automotive; railroad; marine; industrial and central station; nuclear 215
M-252 alloy for heavy-duty gas-turbine buckets 161
Some thoughts about the development of automotive gas-turbine units 73

GENERATORS. *See* ELECTRIC EQUIPMENT

GENTRY, A. A. C.
Marine gas turbines (D) 339

GODWIN, RICHARD P.
Nuclear gas-turbine plants 352

GOVERNORS. *See* INSTRUMENTS—TURBINE-SUPERVISING

GRAHAM, J. B.
Pulverized-coal transport through pipes (D) 53

GRUBER, J. M.
Electrostatic shaft voltage on steam-turbine rotors 97

H

HAAGEN-SMIT, A. J.
Characteristics of airborne particles (D). 12
Studies of air pollution control by Southern California Edison Company 1

HAGE, S. D.
Marine gas turbines (D) 340

HANSEN, E. F.
Electrostatic shaft voltage on steam-turbine rotors 97

HEAT-EXCHANGE EQUIPMENT
Cycle components (for gas turbines) 244
Flow-induced noise in heat exchangers 417
Transient response of gas-turbine-plant heat exchangers—regenerators, intercoolers, precoolers, and ducting 433

HEAT TRANSFER. *See also* THERMAL STRESSES
Simplified regenerator theory 142

HECKMAN, G. R.
Materials (for gas turbines) 219

HERBENAR, A. W.
Materials (for gas turbines) 219

HIGH-TEMPERATURE MATERIALS
M-252 alloy for heavy-duty gas-turbine buckets 161
Materials (for gas turbines) 219

HOFFMAN, H. T.
New performance criterion for steam-turbine regenerative cycles (D) 401

HOLCOMB, LOWELL A.
Calibration of thermocouples by freezing-point baths and empirical equations (D) 188
Power Test Code thermometer wells (D). 409

HRYNISZAK, W.
Some thoughts about the development of automotive gas-turbine units 73

HUTCHINSON, D. W.
Some thoughts about the development of automotive gas-turbine units (D) 95

HYDROSTATIC TESTING
Some notes on the strength of the Enrico Fermi reactor vessel structure 66

I

IBELE, W. E.
Effect of fuel types and admission method upon combustion efficiency 423

INDUSTRIAL FURNACES
Aerodynamic approach to furnace design. 361
Basic principles of combustion-model research 383

INSTRUMENTS—AIR-FLOW. *See* SMOKE-FLOW VIZUALIZATION

INSTRUMENTS—TEMPERATURE
Calibration of thermocouples by freezing-point baths and empirical equations 177
Power Test Code thermometer wells 403

INSTRUMENTS—TURBINE-SUPERVISING
Effect of steam-turbine reheat on speed-governor performance 201

INTERCOOLERS. *See* HEAT-EXCHANGE EQUIPMENT

IPSEN, P. G.
Control system of a 225,000-kw double-automatic extraction steam turbine and related reducing stations 111
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping (D) 139

J

JACKSON, R. L.
Marine gas turbines (D) 340
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping (D) 139

JETS
Aerodynamic approach to furnace design. 361
Basic principles of combustion-model research 383

JOHNSON, L. E.
Use of flow models for boiler-furnace design 371

JOHNSON, RAWLEIGH M.
Power Test Code thermometer wells (D). 409

K

KAMARCK, FRANK M.
Power Test Code thermometer wells (D). 410

KEENAN, J. H.
Availability balance of steam power plants (D) 42

KRAUS, HARRY
Stresses in hollow cylinders due to asymmetrical heat generation 449

L

LANCASTER, OTIS E.
Aviation gas turbines 265
Rocket turbines 280

LEMON, L. W.
Control system of a 225,000-kw double-automatic extraction steam turbine and related reducing stations (D) 121

LIND, JULIUS A.
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping (D) 140

LING, S.
Operating results of an experimental supercritical steam generator 55

LOCOMOTIVES—GAS-TURBINE
Railroad gas turbines 298

LONDON, A. L.
Compound piston-and-turbine engines 259
Transient response of gas-turbine-plant heat exchangers—regenerators, intercoolers, precoolers, and ducting 433

M

MCCUTCHEON, K. C.
Aerodynamic approach to furnace design (D) 369

MCMANUS, H. N., JR.
Effect of fuel types and admission method upon combustion efficiency 423

MALLETTE, FREDERICK S.
Studies of air pollution control by Southern California Edison Company (D) 5

MARINE ENGINEERING
Marine gas turbines 311

MARKHAM, B. G.
Marine gas turbines (D) 340

MARSHALL, C. R.
Use of models for studying pulverized-coal burner performance (D) 382

MARTIN, J. A.
Availability balance of steam power plants 35

MARTINUZZI, P. F
Cycle components (for gas turbines) 244

MATERIALS HANDLING. *See* COAL HANDLING, PNEUMATIC CONVEYERS

MAYERS, M. A.
Aerodynamic approach to furnace design (D) 369

METAL TESTING
M-252 alloy for heavy-duty gas-turbine buckets 161

MEYER, C. A.
Availability balance of steam power plants 35

MEYER, W. M.
Railroad gas turbines 298

MILES, J. C.
Some thoughts about the development of automotive gas-turbine units (D) 95

MISSILES
Rocket turbines 280

MITCHELL, J. W.
Transient response of gas-turbine-plant heat exchangers—regenerators, intercoolers, precoolers, and ducting 433

MODELS
Aerodynamic approach to furnace design. 361
Basic principles of combustion-model research 383
Use of flow models for boiler-furnace design 371
Use of models for studying pulverized-coal burner performance 380

MOTOR VEHICLES. *See* GAS TURBINES

MURDOCK, J. W.
Power Test Code thermometer wells 403

MURPHY, T. E.
Effect of fuel types and admission method upon combustion efficiency 423

N

NEUHART, D. S.
Railroad gas turbines 298

NEWHOUSE, D. L.
M-252 alloy for heavy-duty gas-turbine buckets 161

NEWMAN, L. L.
Fuels (for gas turbines) (D) 243

NOISE. *See* HEAT-EXCHANGE EQUIPMENT, VIBRATION

O

ONDERDONK, P. T.
Five years' experience on the Consolidated Edison system with protection of turbine generators and boilers by automatic tripping 133

OPDYKE, GEORGE, JR.
Effect of fuel types and admission method upon combustion efficiency (D) 427

P

PATTERSON, R. C.
Pulverized-coal transport through pipes. 43

PAYNTER, H. M.
Effect of steam-turbine reheat on speed-governor performance (D) 206

PENNER, S. S.
Basic principles of combustion-model research (D) 388

PHILLIPS, H.
Operating results of an experimental supercritical steam generator 55

PIPELINES. *See* COAL HANDLING, PNEUMATIC CONVEYERS

PITT, PAUL A.
Marine gas turbines (D) 341

PLATES
Theoretical stresses near a circular opening in a flat plate, reinforced with a cylindrical outlet 189

PNEUMATIC CONVEYERS
Pulverized-coal transport through pipes. 43

POWER PLANTS—GAS-TURBINE
Industrial and central station gas turbines 344

POWER PLANTS—NUCLEAR. *See also* PRESSURE VESSELS
Nuclear gas-turbine plants 352
Stresses in hollow cylinders due to asymmetrical heat generation 449

POWER PLANTS—STEAM. *See also* STEAM TURBINES
Availability balance of steam power plants 35
Five years' experience on the Consolidated Edison system with protection of

(D) denotes discussion of a paper.

POWER PLANTS—STEAM (*continued*)
turbine generators and boilers by automatic tripping ... 133
Operating results of an experimental supercritical steam generator ... 55
PRECOOLERS. *See* HEAT-EXCHANGE EQUIPMENT
